# Value Creation

Chemistry, Physics and Engineering Uniquely Combined

Novalled brings together three key disciplines in the field of organic electronics:

- organic chemistry: discovery, testing and scaling of organic electronic materials
- device physics: development of OLED technology and devices
- manufacturing: processes for the testing and development of materials and devices

These 3 skills serve Novalled in different industries:

Skills	Products & Services	Industries
Chemistry Physics & Optics Engineering & Manufacturing	Material Consulting IP Licensing	Display Lighting OPV Other OE
